Elsevier Scientific Publishers Ireland Ltd.

# SUBJECT INDEX

## Volume 56 (1988)

Abscisic acid, dimethyloctadienedioic acid, wilt, biosynthesis, 49
Age-dependent, surface proteins, normal growth, lectin, peroxidase, 27
*Alternaria alternata* f.sp. *lycopersici*, host-specific toxins, in vitro selection, disease resistance, 253
*Alternaria brassicae*, resistance, phytoalexins, 21
Aluminium, pollen tube growth, poly-L-aspartic acid, poly-L-glutamic acid, tea (*Camellia sinesis*), calcium, calmodulin, 55
Amino acid sequence, *Glycine max*, seed storage protein, glycinin $A_3$ subunit, 189
Anaerobiosis, glycerol, high performance liquid chromatography, crop plants, 31
Anthraquinones, *Rhamnus frangula* L., rhamnaceae, plant cell culture, 123
Antibodies, *Cucurbita pepo medullosa*, ascorbate oxidase, cross-reactivity, 107
*Arabidopsis thaliana*, stress, membranes, 15
Arabinosyl transferase, endoplasmic reticulum localization, hydroxyproline-rich glycoproteins, maize roots, 205
Ascorbate oxidase, *Cucurbita pepo medullosa*, antibodies, cross-reactivity, 107
ATPase, plasma membrane, lipid, 117
Autotetraploid, polyploidy, $C_4$ photosynthesis, pearl millet (*Pennisetum americanum*), leaf anatomy, 85

Biological herbicide, microbial herbicide, mycoherbicide, 261
Biosynthesis, dimethyloctadienedioic acid, abscisic acid, wilt, 49
—, poly(γ-glutamylcysteinyl)glycine, metallothionein, cadystin, phytochelatins, syntheis, synthetic gene, 197
*Brassica oleracea* var. *botrytis*, glyoxalase-I, GSH, MGBG, polyamine, 167
*N*-Bromosuccinimide, DTNB, *N*-ethylmaleimide, *p*-chloromercuribenzoate, tetranitromethane, photooxidation, 113

$C_2H_2$ reduction, intracellular pH, nitrate, proteolysis, root nodule, senescence, 99
$C_4$ photosynthesis, polyploidy, autotetraploid, pearl millet (*Pennisetum americanum*), leaf anatomy, 85
Cadystin, poly(γ-glutamylcysteinyl)glycine, metallothionein, phytochelatins, biosynthesis, synthesis, synthetic gene, 197
Calcium, aluminium, pollen tube growth, poly-L-aspartic acid, poly-L-glutamic acid, tea (*Camellia sinesis*), calmodulin, 55
Calmodulin, aluminium, pollen tube growth, poly-L-aspartic acid, poly-L-glutamic acid, tea (*Camellia sinesis*), calcium, 55
Cell cultures, $H^+$ translocating ATPases, membrane fractions, plasma membrane, protoplasts, *Rubus hispidus*, tonoplast, 149
—, photoautotrophic, RuBP-carboxylase, soybean, photosynthesis, 69
Cell suspension culture, *Prunus dulcis*, 2,3,5-triphenyltetrazolium chloride, heat shock proteins, proline, 245
Cell wall synthesis, *Solanum tuberosum*, flow cytometry, flow sorting, heterokaryons, hybrids, 61
Cherry rootstocks, *Prunus cerasus* L., protoplast culture, rhizogenesis, plant regeneration, 75
*Chlamydomonas*, chloroplast genes, chloroplast nucleoids, maternal inheritance, polypeptides, preferential digestion, 129
*p*-Chloromercuribenzoate, DTNB, *N*-ethylmaleimide, tetranitromethane, *N*-bromosuccinimide, photooxidation, 113
Chlorophyll fluorescence, triazine-resistance, photosystem II, methyl purple, $D_1$ protein, *Solanum nigrum* L., 39
Chloroplast genes, *Chlamydomonas*, chloroplast nucleoids, maternal inheritance, polypeptides, preferential digestion, 129
Chloroplast nucleoids, *Chlamydomonas*, chloroplast genes, maternal inheritance, polypeptides, preferential digestion, 129
Cotyledon and leaf mitochondria, *Glycine max*, *Lupinus albus*, glyoxysomal and peroxisomal enzymes, malate and glycine oxidation, cyanide and rotenone resistance, 1
Crop plants, glycerol, high performance liquid chromatography, anaerobiosis, 31
Cross-reactivity, *Cucurbita pepo medullosa*, ascorbate oxidase, antibodies, 107
*Cucurbita pepo medullosa*, ascorbate oxidase, antibodies, cross-reactivity, 107
Cyanide and rotenone resistance, *Glycine max*, *Lupinus albus*, glyoxysomal and peroxisomal enzymes, cotyledon and leaf mitochondria, malate and glycine oxidation, 1
Cytoplasmic male-sterility, *Vicia faba*, virus purification, VLPs, ELISA, 9

$D_1$ protein, triazine-resistance, photosystem II, chlorophyll fluorescence, methyl purple, *Solanum nigrum* L., 39
Dimethyloctadienedioic acid, abscisic acid, wilt, biosynthesis, 49
Disease resistance, *Alternaria alternata* f.sp. *Lycopersici*, host-specific toxins, in vitro selection, 253
DTNB, *N*-ethylmaleimide, *p*-chloromercuribenzoate, tetranitromethane, *N*-bromosuccinimide, photooxidation, 113

Egg-transformation, *Nicotiana tabacum*, *Nicotiana glutinosa*, pollen irradiation, haploidy, 155
Electrical potentials, *Spinacia oleracea*, floral induction, peroxidase activity, 93
Electroporation, transient transformation, zein promoter, maize protoplasts, 161
ELISA, *Vicia faba*, cytoplasmic male-sterility, virus purification, VLPs, 9
Endoplasmic reticulum localization, arabinosyl transferase, hydroxyproline-rich glycoproteins, maize roots, 205
*N*-Ethylmaleimide, DTNB, *p*-chloromercuribenzoate, tetranitromethane, *N*-bromosuccinimide, photooxidation, 113

Floral induction, *Spinacia oleracea*, peroxidase activity, electrical potentials, 93
Flow cytometry, phytotoxins, fluorescein diacetate, protoplasts, 183
–, *Solanum tuberosum*, flow sorting, heterokaryons, cell wall synthesis, hybrids, 61
Flow sorting, *Solanum tuberosum*, flow cytometry, heterokaryons, cell wall synthesis, hybrids, 61
Fluorescein diacetate, flow cytometry, phytotoxins, protoplasts, 183

Gene expression, ribulose-1,5-bisphosphate carboxylase-oxygenase (small subunit), plant-pathogen interactions, sunflower, *Sclerotinia sclerotiorum* toxin, 219
Glycerol, high performance liquid chromatography, anaerobiosis, crop plants, 31
*Glycine max*, *Lupinus albus*, glyoxysomal and peroxisomal enzymes, cotyledon and leaf mitochondria, malate and glycine oxidation, cyanide and rotenone resistance, 1
–, seed storage protein, glycinin $A_1$ subunit, amino acid sequence, 189
Glycinin $A_1$ subunit, *Glycine max*, seed storage protein, amino acid sequence, 189
Glyoxalase-I, *Brassica oleracea* var. *botrytis*, GSH, MGBG, polyamine, 167
Glyoxysomal and peroxisomal enzymes, *Glycine max*, *Lupinus albus*, cotyledon and leaf mitochondria, malate and glycine oxidation, cyanide and rotenone resistance, 1
GSH, *Brassica oleracea* var. *botrytis*, glyoxalase-I, MGBG, polyamine, 167

$H^+$ translocating ATPases, cell cultures, membrane fractions, plasma membrane, protoplasts, *Rubus hispidus*, tonoplast, 149
Haploidy, *Nicotiana tabacum*, *Nicotiana glutinosa*, egg-transformation, pollen irradiation, 155
Heat shock proteins, *Prunus dulcis*, 2,3,5-triphenyltetrazolium chloride, cell suspension culture, proline, 245
Herbicide amiprophos methyl, telophasing of metaphase chromosomes, micronuclei, microcell hybridization, partial genome transfer, 227
Heterokaryons, *Solanum tuberosum*, flow cytometry, flow sorting, cell wall synthesis, hybrids, 61
High performance liquid chromatography, glycerol, anaerobiosis, crop plants, 31
Host-specific toxins, *Alternaria alternata* f.sp. *lycopersici*, in vitro selection, disease resistance, 253
Hybrids, *Solanum tuberosum*, flow cytometry, flow sorting, heterokaryons, cell wall synthesis, 61
Hydroxyproline-rich glycoproteins, arabinosyl transferase, endoplasmic reticulum localization, maize roots, 205

Immature embryos, plant regeneration, sunflower, 177
*myo*-Inositol monophosphatase, *Lilium longiflorum*, phytase, phytic acid, pollen, 137
Intracellular pH, $C_2H_2$ reduction, nitrate, proteolysis, root nodule, senescence, 99
In vitro selection, *Alternaria alternata* f.sp. *lycopersici*, host-specific toxins, disease resistance, 253

Leaf anatomy, polyploidy, $C_4$ photosynthesis, autotetraploid, pearl millet (*Pennisetum americanum*), 85
Lectin, age-dependent, surface proteins, normal growth, peroxidase, 27
*Lilium longiflorum*, *myo*-inositol monophosphatase, phytase, phytic acid, pollen, 137
Lipid, plasma membrane, ATPase, 117
*Lupinus albus*, *Glycine max*, glyoxysomal and peroxisomal enzymes, cotyledon and leaf mitochondria, malate and glycine oxidation, cyanide and rotenone resistance, 1

Maize protoplasts, transient transformation, electroporation, zein promoter, 161
Maize roots, arabinosyl transferase, endoplasmic reticulum localization, hydroxyproline-rich glycoproteins, 205
Malate and glycine oxidation, *Glycine max*, *Lupinus albus*, glyoxysomal and peroxisomal enzymes, cotyledon and leaf mitochondria, cyanide and rotenone resistance, 1
Maternal inheritance, *Chlamydomonas*, chloroplast genes, chloroplast nucleoids, polypeptides, preferential digestion, 129
Membranes, stress, *Arabidopsis thaliana*, 15

Membrane fractions, cell cultures, $H^+$ translocating ATPases, plasma membrane, protoplasts, *Rubus hispidus*, tonoplast, 149
Metallothionein, poly(γ-glutamylcysteinyl)glycine, cadystin, phytochelatins, biosynthesis, synthesis, synthetic gene, 197
Methyl purple, triazine-resistance, photosystem II, chlorophyll fluorescence, $D_1$ protein, *Solanum nigrum* L., 39
MGBG, *Brassica oleracea* var. *botrytis*, glyoxalase-I, GSH, polyamine, 167
Microbial herbicide, biological herbicide, mycoherbicide, 261
Microcell hybridization, herbicide amiprophos methyl, telophasing of metaphase chromosomes, micronuclei, partial genome transfer, 227
Micronuclei, herbicide amiprophos methyl, telophasing of metaphase chromosomes, microcell hybridization, partial genome transfer, 227
Mycoherbicide, biological herbicide, microbial herbicide, 261

*Nicotiana glutinosa*, *Nicotiana tabacum*, egg-transformation, pollen irradiation, haploidy, 155
*Nicotiana tabacum*, *Nicotiana glutinosa*, egg-transformation, pollen irradiation, haploidy, 155
*Nicotiana tabacum* var *samsun*, Ri(A4)plasmid, organ-specific mRNA, 213
Nitrate, $C_2H_2$ reduction, intracellular pH, proteolysis, root nodule, senescence, 99
Normal growth, age-dependent, surface proteins, lectin, peroxidase, 27

Organ-specific mRNA, *Nicotiana tabacum* var. *samsun*, Ri(A4)plasmid, 213

Partial genome transfer, herbicide amiprophos methyl, telophasing of metaphase chromosomes, micronuclei, microcell hybridization, 227
Pearl millet (*Pennisetum americanum*), polyploidy, $C_4$ photosynthesis, autotetraploid, leaf anatomy, 85
Peroxidase, age-dependent, surface proteins, normal growth, lectin, 27
Peroxidase activity, *Spinacia oleracea*, floral induction, electrical potentials, 93
Photoautotrophic, cell cultures, RuBP-carboxylase, soybean, photosynthesis, 69
Photooxidation, DTNB, *N*-ethylmaleimide, *p*-chloromercuribenzoate, tetranitromethane, *N*-bromosuccinimide, 113
Photosynthesis, cell cultures, photoautotrophic, RuBP-carboxylase, soybean, 69
Photosystem II, triazine-resistance, chlorophyll fluorescence, methyl purple, $D_1$ protein, *Solanum nigrum* L., 39
Phytase, *Lilium longiflorum*, *myo*-inositol monophosphatase, phytic acid, pollen, 137
Phytic acid, *Lilium longiflorum*, *myo*-inositol monophosphatase, phytase, pollen, 137
Phytoalexins, *Alternaria brassicae*, resistance, 21
Phytochelatins, poly(γ-glutamylcysteinyl)glycine, metallothionein, cadystin, biosynthesis, synthesis, synthetic gene, 197
Phytotoxins, flow cytometry, fluorescein diacetate, protoplasts, 183
Plant-pathogen interactions, ribulose-1,5-bisphosphate carboxylase-oxygenase (small subunit), gene expression, sunflower, *Sclerotinia sclerotiorum* toxin, 219
Plant cell culture, *Rhamnus frangula* L., rhamnaceae, anthraquinones, 123
Plant regeneration, immature embryos, sunflower, 177
—, *Prunus cerasus* L., cherry rootstocks, protoplast culture, rhizogenesis, 75
Plant transplantation, tobacco, rice, *Solanum*, 81
Plasma membrane, ATPase, lipid, 117
—, cell cultures, $H^+$ translocating ATPases, membrane fractions, protoplasts, *Rubus hispidus*, tonoplast, 149
Pollen, *Lilium longiflorum*, *myo*-inositol monophosphatase, phytase, phytic acid, 137
Pollen irradiation, *Nicotiana tabacum*, *Nicotiana glutinosa*, egg-transformation, haploidy, 155
Pollen tube growth, aluminium, poly-L-aspartic acid, poly-L-glutamic acid, tea (*Camellia sinesis*), calcium, calmodulin, 55
Poly(γ-glutamylcysteinyl)glycine, metallothionein, cadystin, phytochelatins, biosynthesis, synthesis, synthetic gene, 197
Poly-L-aspartic acid, aluminium, pollen tube growth, poly-L-glutamic acid, tea (*Camellia sinesis*), calcium, calmodulin, 55
Poly-L-glutamic acid, aluminium, pollen tube growth, poly-L-aspartic acid, tea (*Camellia sinesis*), calcium, calmodulin, 55
Polyamine, *Brassica oleracea* var. *botrytis*, glyoxalase-I, GSH, MGBG, 167
Polypeptides, *Chlamydomonas*, chloroplast genes, chloroplast nucleoids, maternal inheritance, preferential digestion, 129
Polyploidy, $C_4$ photosynthesis, autotetraploid, pearl millet (*Pennisetum americanum*), leaf anatomy, 85
Preferential digestion, *Chlamydomonas*, chloroplast genes, chloroplast nucleoids, maternal inheritance, polypeptides, 129
Proline, *Prunus dulcis*, 2,3,5-triphenyltetrazolium chloride, heat shock proteins, cell suspension culture, 245
Proteolysis, $C_2H_2$ reduction, intracellular pH, nitrate, root nodule, senescence, 99
Protoplasts, cell cultures, $H^+$ translocating ATPases, membrane fractions, plasma membrane, *Rubus hispidus*, tonoplast, 149
—, flow cytometry, phytotoxins, fluorescein diacetate, 183
Protoplast culture, *Prunus cerasus* L., cherry rootstocks, rhizogenesis, plant regeneration, 75

*Prunus amygdalus*, *Prunus dulcis*, temperature sensitivity, 239
*Prunus cerasus* L., cherry rootstocks, protoplast culture, rhizogenesis, plant regeneration, 75
*Prunus dulcis*, *Prunus amygdalus*, temperature sensitivity, 239
–, 2,3,5-triphenyltetrazolium chloride, heat shock proteins, cell suspension culture, proline, 245

Resistance, *Alternaria brassicae*, phytoalexins, 21
Rhamnaceae, *Rhamnus frangula* L., plant cell culture, anthraquinones, 123
*Rhamnus frangula* L., rhamnaceae, plant cell culture, anthraquinones, 123
Rhizogenesis, *Prunus cerasus* L., cherry rootstocks, protoplast culture, plant regeneration, 75
Ri(A4)plasmid, *Nicotiana tabacum* var. *samsun*, organ-specific mRNA, 213
Ribulose-1,5-bisphosphate carboxylase-oxygenase (small subunit), gene expression, plant-pathogen interactions, sunflower, *Sclerotinia sclerotiorum* toxin, 219
Rice, plant transplantation, tobacco, *Solanum*, 81
Root nodule, $C_2H_2$ reduction, intracellular pH, nitrate, proteolysis, senescence, 99
RuBP-carboxylase, cell cultures, photoautotrophic, soybean, photosynthesis, 69
*Rubus hispidus*, cell cultures, $H^+$ translocating ATPases, membrane fractions, plasma membrane, protoplasts, tonoplast, 149

*Sclerotinia sclerotiorum* toxin, ribulose-1,5-bisphosphate carboxylase-oxygenase (small subunit), gene expression, plant-pathogen interactions, sunflower, 219
Seed storage protein, *Glycine max*, glycinin A, subunit, amino acid sequence, 189
Senescence, $C_2H_2$ reduction, intracellular pH, nitrate, proteolysis, root nodule, 99
*Solanum*, plant transplantation, tobacco, rice, 81
*Solanum nigrum* L., triazine-resistance, photosystem II, chlorophyll fluorescence, methyl purple, $D_1$ protein, 39
*Solanum tuberosum*, flow cytometry, flow sorting, heterokaryons, cell wall synthesis, hybrids, 61
Soybean, cell cultures, photoautotrophic, RuBP-carboxylase, photosynthesis, 69
*Spinacia oleracea*, floral induction, peroxidase activity, electrical potentials, 93
Stress, membranes, *Arabidopsis thaliana*, 15
Sunflower, immature embryos, plant regeneration, 177
–, ribulose-1,5-bisphosphate carboxylase-oxygenase (small subunit), gene expression, plant-pathogen interactions, *Sclerotinia sclerotiorum* toxin, 219
Surface proteins, age-dependent, normal growth, lectin, peroxidase, 27
Synthesis, poly(γ-glutamylcysteinyl)glycine, metallothionein, cadystin, phytochelatins, biosynthesis, synthetic gene, 197
Synthetic gene, poly(γ-glutamylcysteinyl)glycine, metallothionein, cadystin, phytochelatins, biosynthesis, synthesis, 197

Tea (*Camellia sinesis*), aluminium, pollen tube growth, poly-L-aspartic acid, poly-L-glutamic acid, calcium, calmodulin, 55
Telophasing of metaphase chromosomes, herbicide amiprophos methyl, micronuclei, microcell hybridization, partial genome transfer, 227
Temperature sensitivity, *Prunus dulcis*, *Prunus amygdalus*, 239
Tetranitromethane, DTNB, *N*-ethylmaleimide, *p*-chloromercuribenzoate, *N*-bromosuccinimide, photooxidation, 113
Tobacco, plant transplantation, rice, *Solanum*, 81
Tonoplast, cell cultures, $H^+$ translocating ATPases, membrane fractions, plasma membrane, protoplasts, *Rubus hispidus*, 149
Transient transformation, electroporation, zein promoter, maize protoplasts, 161
Triazine-resistance, photosystem II, chlorophyll fluorescence, methyl purple, $D_1$ protein, *Solanum nigrum* L., 39
2,3,5-Triphenyltetrazolium chloride, *Prunus dulcis*, heat shock proteins, cell suspension culture, proline, 245

*Vicia faba*, cytoplasmic male-sterility, virus purification, VLPs, ELISA, 9
Virus purification, *Vicia faba*, cytoplasmic male-sterility, VLPs, ELISA, 9
VLPs, *Vicia faba*, cytoplasmic male-sterility, virus purification, ELISA, 9

Wilt, dimethyloctadienedioic acid, abscisic acid, biosynthesis, 49

Zein promoter, transient transformation, electroporation, maize protoplasts, 161

*Plant Science*, 56 (1988) 269–270

## VOLUME CONTENTS

**Volume 56 (1988)**

**PHYSIOLOGY AND BIOCHEMISTRY**

Properties of mitochondria isolated from greening soybean and lupin tissues
by J. Gerard and P. Dizengremel (Nancy, France) ..... 1–7

Purification of virus-like particles from male-sterile *Vicia faba* and detection by ELISA in crude leaf extracts
by P. Dulieu, F. Penin, H. Dulieu and D.C. Gautheron (Dijon and Villeurbanne, France) ..... 9–14

Changes in lipid composition during protoplast isolation
by J. Browse, C.R. Somerville and C.R. Slack (Palmerston North, New Zealand and East Lansing, MI) ..... 15–20

Resistance to *Alternaria brassicae* and phytoalexin- elicitation in rapeseed and other crucifers
by K.L. Conn, J.P. Tewari and J.S. Dahiya (Edmonton, Canada) ..... 21–25

Age-dependent appearance of specific proteins on cucumber surfaces under normal growth conditions
by H. Skubatz and B. Kessler (Ramat-Gan, Israel) ..... 27–30

Glycerol concentrations in crop plants
by D.W. Gerber, R.U. Byerrum, R.W. Gee and N.E. Tolbert (East Lansing, MI) ..... 31–38

Enhanced susceptibility of photosynthesis to high leaf temperature in triazine-resistant *Solanum nigrum* L. Evidence for photosystem II $D_1$ protein site of action
by J.M. Ducrue and D.R. Ort (Urbana, IL) ..... 39–48

2,7-Dimethylocta-2,4-dienedioic acid is not a by-product of abscisic acid biosynthesis
by B.V. Milborrow, H.N. Nonhebel and R.D. Willows (Kensington, Australia) ..... 49–53

Effect of acidic polypeptides on aluminium toxicity in tube growth of pollen from tea (*Camellia sinensis* L.)
by S. Konishi, I.B. Ferguson and J. Putterill (Auckland, New Zealand) ..... 55–59

**GENETICS AND MOLECULAR BIOLOGY**

Inhibition of cell wall synthesis improves flow cytometric sorting of potato heterofusions resulting in hybrid plants
by K. Puite, W.T. Broeke and J. Schaart (Wageningen, The Netherlands) ..... 61–68

**CELL AND TISSUE STUDIES IN VITRO**

Comparison of photosynthetic characteristics of two photoautotrophic cell suspension cultures of soybean
by S.M.D. Rogers and J.M. Widholm (Urbana, IL) ..... 69–74

An alternative approach to plant regeneration from protoplasts of sour cherry (*Prunus cerasus* L.)
by S.J. Ochatt and J.B. Power (Nottingham, U.K.) ..... 75–79

A simple method for direct transplantation of cultured plants to the field
by A. Selvapandiyan, J. Subramani, P.N. Bhatt and A.R. Mehta (Baroda, India) ..... 81–83

$C_4$ photosynthesis and leaf anatomy in diploid and autotetraploid *Pennisetum americanum* (pearl millet)
by D.A. Warner and G.E. Edwards (Pullman, WA) ..... 85–92

**PHYSIOLOGY AND BIOCHEMISTRY**

Peroxidase activity in relation to photoperiodic induction and electric potentials applied to petioles of spinach
by M. Montavon, C. Penel and H. Greppen (Geneva, Switzerland) ..... 93–97

Changes in intracellular pH in French-bean nodules induced by senescence and nitrate treatment
by D. Pladys, P. Barthe and J. Rigaud (Nice, France) ..... 99–106

Characterization and cross-reactivity of antibodies against ascorbate oxidase from green zucchini marrows (*Cucurbita pepo medullosa*)
by G. D'Andrea, A. Oratore, L. Avigliano, A. Rossi and A. Finazzi-Agrò (Rome, Italy) ..... 107–112

Active site groups; chemical inactivation of mung bean phosphoglycerate kinase
by A. Kumar and P.O. Malhotra (Varanasi, India) ..... 113–116

Lipid requirements of the plasma membrane ATPases from oat roots and yeast
by R. Serrano. C. Montesinos and J. Sanchez (Madrid, Spain and Heidelberg, F.R.G.) ..... 117–122

Anthra-derivatives in suspension cell cultures of *Rhamnus frangula*
by A.J.J. van den Berg, M.H. Radema and R.P. Labadie (Utrecht, The Netherlands) ..... 123–127

Polypeptides related to preferential digestion of male chloroplast nucleoids in *Chlamydomonas*
by S. Nakamura, C. Sato and T. Kuroiwa (Okazaki and Kidagun, Japan) ..... 129–136

Localization of constitutive phytases in lily pollen and properties of the pH 8 form
by B.G. Baldi, J.J. Scott, J.D. Everard and F.A. Loewus (Pullman, WA) ..... 137–147

Inhibition by vanadate of the tonoplast $H^+$ translocating ATPase of *Rubus* cells
by H. Henry and P.-E. Pilet (Lausanne, Switzerland) ..... 149–154

**GENETICS AND MOLECULAR BIOLOGY**

An evaluation of the use of irradiated pollen for gene transfer in *Nicotiana*
by S.M. Reed, E.A. Wernsman, J.A. Burns and M.G. Kramer (Raleigh, NC) ..... 155–160

Zein promoter activity in transiently transformed protoplasts from maize
by M. Schwall and G. Feix (Freiburg, F.R.G.) ..... 161–166

**CELL AND TISSUE STUDIES IN VITRO**

Control of cell proliferation and differentiation by regulating polyamine biosynthesis in cultures of *Brassica* and its correlation with glyoxalase-I activity
by U. Sethi, A. Basu and S. Guha-Mukherjee (New Delhi, India) ..... 167–175

Fertile plant regeneration from sunflower (*Helianthus annuus* L.) immature embryos
by M. Freyssinet and G. Freyssinet (Lyon, France) ..... 177–181

**GENERAL**

Flow cytometry as a method for assaying the biological activity of phytotoxins
by D.L. Berglund, S. Strobel, F. Sugawara and G.A. Strobel (Bozeman, MT) ..... 183–188

**PHYSIOLOGY AND BIOCHEMISTRY**

Identification and structural characterization of the glycinin seed storage protein $A_1$ subunit of soybean
by H. Kagawa and H. Hirano (Ibaraki, Japan) ..... 189–195

Biosynthesis of poly(γ-glutamylcysteinyl)glycines in cadmium-tolerant *Datura innoxia* (Mill.) cells
by N.J. Robinson, R.L. Ratliff, P.J. Anderson, E. Delhaize, J.M. Berger and P.J. Jackson (Los Alamos, NM) ..... 197–204

Hydroxyproline-arabinosylation in the endoplasmic reticulum of maize roots
by M. Andreae, W.C. Lang, C. Barg and D.G. Robinson (Göttingen and Kaiserslautern, F.R.G.) .. 205–212

**GENETICS AND MOLECULAR BIOLOGY**

Organ-specific mRNA in transgenic tobacco plants possessing T-DNA of Ri plasmids
by T. Nakamura, T. Handa, Y. Oono, K. Kanaya, M. Michikawa and H. Uchimiya (Ibaraki, Japan) 213–218

Ribulose 1,5-bisphosphate carboxylase-oxygenase small subunit transcripts as a susceptibility reflecting molecular marker in sunflower infected with *Sclerotinia sclerotiorum*
by A. Mouly, D. Roby and M.-T. Esquerré-Tugayé (Toulouse, France) ..... 219–225

**CELL AND TISSUE STUDIES IN VITRO**

Chromosome behaviour and formation of micronuclei after treatment of cell suspension cultures with amiprophos-methyl in various plant species
by K.S. Ramulu, H.A. Verhoeven, P. Dijkhuis and L.J.W. Gilissen (Wageningen, The Netherlands) ..... 227–237

The temperature response of cultured almond cells derived from tree sources with and without non-infectious bud failure. I. Specific growth rate
by C.A.L. Fenton, D.E. Kester and L. Liu (Davis, CA) ..... 239–243

The temperature response of cultured almond cells derived from tree sources with and without non-infectious bud failure. II. Heat Shock
by C.A.L. Fenton, A.H. Kuniyuki and D.E. Kester (Davis, CA) ..... 245–251

**GENERAL**

Effects of *Alternaria alternata* f.sp. *lycopersici* toxins at different levels of tomato plant cell development
by H.M.A. Witsenboer, C.E. van Schaik, R.J. Bino, H.J.M. Löffler, H.J.J. Nijkamp and J. Hille (Amsterdam and Wageningen, The Netherlands) ..... 253–260

Factors influencing biocontrol of jimsonweed (*Datura stramonium* L.) with the leaf-spotting fungus *Alternaria crassa*
by C.D. Boyette and L.B. Turfitt (Stoneville, MS) ..... 261–264

Subject Index Volume 56 ..... 265–268

Author Index Volume 56 ..... 269–270

Contents Volume 56 ..... 271–273
